## PRESS RELEASE

### i2S Partners with Sidus Solutions to Expand Orphie Subsea Camera Range, Highly Recognized for its Image Quality, in the U.S. Market

**Bordeaux, France / San Diego, CA – July 1st, 2025** – i2S, a global leader in advanced underwater imaging systems and manufacturer of the innovative Orphie range of subsea cameras, is pleased to announce a strategic partnership with Sidus Solutions, a premier provider of robust subsea video surveillance and inspection systems. Under this agreement, Sidus Solutions will become the local distributor of the Orphie camera range in the United States.

The Orphie range, developed by i2S, features patented technology that increases underwater viewing distances by a factor of three, enabling safer and more efficient subsea inspections. The cameras are designed for seamless integration with ROVs, AUVs, and diver helmets, offering plug-and-play adaptability and high-definition imaging for a wide variety of subsea applications. This innovation allows operators to conduct higher-quality inspections in significantly less time, addressing the growing demand for advanced imaging solutions in offshore energy, marine research, and underwater infrastructure sectors.

Sidus Solutions, headquartered in San Diego, California, brings over two decades of expertise in subsea and hazardous area monitoring, engineering, and system integration. Renowned for delivering reliable, field-proven solutions to the research, commercial, military, and energy markets, Sidus is ideally positioned to introduce the Orphie range to U.S. customers and support their deployment in challenging environments.

*«Our collaboration with Sidus Solutions marks a significant milestone in our international growth strategy driving our high ambition in the subsea camera market»* said Xavier Datin, CEO of i2S. *«Sidus's deep experience in subsea applications and their strong reputation for technical excellence make them the perfect partner to bring our innovative Orphie cameras to the U.S. market.»*

Xavier DATIN, CEO of i2S

Leonard POOL, CEO of Sidus

Leonard Pool, founder and owner of Sidus Solutions, added: *«We are excited to partner with i2S and offer the Orphie range to our clients. The advanced imaging capabilities of these cameras align perfectly with our commitment to delivering the most robust and effective subsea solutions available. Together, we will help drive operational efficiency and safety for underwater projects across the United States.»*

This partnership leverages i2S's cutting-edge imaging technology and Sidus's established presence and technical support network, providing a local stock and full after-sales service, ensuring that U.S. customers benefit from both innovation and local expertise.

## **About i2S Orphie**

i2S specializes in the design of complex underwater imaging systems, with the Orphie range setting new standards for visibility, efficiency, and safety in subsea operations. The company's patented technology is trusted worldwide for a variety of underwater applications, from scientific research to industrial inspection.

## **About Sidus Solutions**

Sidus Solutions, LLC is a San Diego-based, service-disabled veteran-owned small business providing integrated subsea monitoring and video surveillance systems. With a comprehensive portfolio of underwater cameras, positioners, lighting, and engineering services, Sidus serves clients in research, energy, defense, and commercial sectors worldwide.
